Mobile Developer with Flutter

Hiring organization
Arrk Limited

Date posted
26/07/2024

Description
Experience: 5-9 Years

Location: Open to Work from Office – Mahape and can join immediately

Job Description:

We are seeking a talented and experienced Mobile Developer with expertise in Flutter to join our dynamic team. The ideal candidate will have a strong background in developing high-quality mobile applications and be proficient in Flutter for cross-platform development. You will be responsible for designing, developing, and maintaining mobile applications, ensuring they meet high performance, quality, and responsiveness standards.

Key Responsibilities:

- Minimum 5 years of experience in mobile application development.
- Minimum 2 years of experience in Flutter framework.
- Design and develop mobile applications using Flutter.
- Collaborate with product managers, designers, and other developers to deliver high-quality software solutions.
- Write clean, maintainable, and efficient code.
- Troubleshoot and debug issues, ensuring optimal performance and usability.
- Stay up to date with the latest industry trends and technologies to continuously improve development practices.
- Conduct code reviews and provide constructive feedback to team members.
- Participate in project planning and estimation.
- Ensure applications are developed with best practices in mind for security, performance, and scalability.

Required Skills and Qualifications:

- Proven experience as a Mobile Developer with a focus on Flutter.
- Strong proficiency in Dart programming language.
- Experience with mobile application development for both iOS and Android platforms.
- Familiarity with RESTful APIs and third-party libraries.
- Experience with version control systems such as Git.
- Knowledge of Agile/Scrum methodologies.
- Excellent problem-solving skills and attention to detail.
- Strong communication and collaboration skills

Preferred Qualifications:

- Experience with other cross-platform frameworks such as React Native or Xamarin.
- Knowledge of native development for iOS (Swift/Objective-C) or Android

(Java/Kotlin).
- Experience with cloud services and backend integration.
- Familiarity with CI/CD pipelines and automated testing.
