AI/Machine Learning Developer

Description
Experience: 4+ Years

Availability: Immediate Joiners, only Mumbai candidates

Eligibility: Only Mumbai candidates

Job Location: Mahape, Navi Mumbai

Job Profile:

- Analyzing the machine learning algorithm that could be used to solve a given problem and ranking them by their success probability
- Exploring and visualizing data to gain an understanding of it, them identifying difference in data distribution that could affect performance when deploying the model in the real world.
- Verifying data quality and/or ensuring data cleaning.
- Training models and running their hyper parameters.
- Analyzing the errors of model and designing strategies to overcome them.
- Deploying model to production.
- Should be comfortable with rapid prototyping practices.
- Understanding of Generative AI and related models.
- Evaluation of LLM models.
- Proficiency with deep learning framework such as TensorFlow, PyTorch or similar.
- Proficiency with Python and basic libraries for ML such as scikit-learn and pandas.
- Expertise in visualizing and manipulating big datasets.
- Ability to understand the NLP framework such as Spacy.
- Familiarity with Linux OS.
- Familiarity with AWS Cloud, AWS Sagemaker.
- Familiarity with REST API.
- Knowledge of OpenCV is an added advantage.
- Ability to select hardware to run an ML model with the required latency.
- Understanding of crawling framework like Scrapy would be an added advantage.
- Excellent communication skill.
- Ability to work in team and as an individual..
